

Can you change the placement/rotation of the AoE pattern after resolving one of the attacks?

No. You must decide the AoE pattern placement and rotation before resolving the 1st attack

Are Melee AoE attacks that have hexes that aren't adjacent to the attacker still considered Range 1?

Yes. So when using Add Target with a Melee AoE attack, the new target must be at range 1.

Add Target

If the attack has targeting or range restrictions, do they still apply to the new target?

Yes. This includes "exactly at range" restrictions, restrictions that state an effect must exist on the target to be attacked or any other targeting qualifiers specified for the attack.

How does Add Target interact with area attacks?

Add Target always adds a single extra target within the range of your attack to the attack, and this target cannot be an enemy already targeted by the attack (a single attack ability cannot target the same enemy multiple times). So if you got an Add Target effect on an area attack, you could pick one enemy within range but outside of the area (because all enemies in the area are already getting attacked) to get hit by the attack as well. All conditions and other effects of the attack (other than effects that would add additional attack targets) would apply to the added target, as well. Each instance of the Add Target effect adds an additional target to the attack using the above guidelines. Add Target DOES NOT add a hex to the area so effects that apply to the "Area" don't apply to the Add Target.

Note that if an attack ability targets everything within a specified range, Add Target would do nothing since you are already targeting everything in that range.

Can you perform an Add Target effect and not attack anything?

No. If you chose to perform the Add Target, you have to attack something

If you gain Add Target for a single target attack that grants XP if the target meets a specific criteria (example: Scoundrel's Single Out), do you gain the XP for the new additional target if it meets the criteria?

Yes

Target X

For the Target X ability, can you choose to attack less than X targets?

Yes

Can you perform a Target X ability and not attack anything?

No. If you chose to perform the Target X ability, you have to attack something.

How does Target X interact with area attacks?

This is handled the same as Add Target, except the figure gains X-1 targets that all must be outside the AoE.

Conditions

If a condition lasts until the end of my next turn, what exactly does "next turn" mean?

"Next turn" means your next full turn. So if you start a turn with the condition in effect, then at the end of that turn, it is removed. If a monster stuns you on its turn, then your next turn (whether that happens in the current round or the following round) you would be under the effect of stun, and then it would go away at the end of that turn. If you manage to get stunned on your own turn, you would immediately suffer the effects, then you would also suffer from the effects on your following turn in the following round before the effect wore off at the end of that turn. This also applies to conditions on monsters.

If I apply POISON with my attack, does it immediately give me +1 on the attack?

No. All added effects of an attack are only applied after the amount of damage is resolved. The one exception to this is PIERCE, which is applied at the same time as the damage.

If I have both the WOUND and POISON conditions and am healed, what happens?

Both conditions are removed and no actual healing takes place.

Can I voluntarily end positive conditions on myself like Strengthen and Invisible?

No.

If I get stunned before I have a chance to play my cards for the round, do I have to discard them, or can I take them back and do a long rest?

You have to discard them.
