Attack Hex			200g divided by the number of hexes currently targeted with the attack				

Example: The Brute wishes to enhance the top action of his ability card with a +1 on the attack . The base cost of this is 50 gold, but it is doubled because the attack targets multiple enemies. In addition, this is a level 3 ability card  , so another 50 gold is added, for a total of 150 gold. Afterwards, the Brute now wants to add an attack hex to the action . This would normally cost 66 gold (200 gold divided by three existing hexes, rounded down), but again, 50 gold is added because the card is level 3, and now an additional 75 gold is added because the action was previously enhanced once, for a total 191 gold.
